

FIREWALL POLICY

CIM Finance Ltd ('Cim Finance') has implemented a firewall policy which describes how firewalls will filter network traffic in order to mitigate risks and losses associated with security threats, while maintaining appropriate levels of access for business users.

The Firewall Policy is subordinate to Cim Finance's general Security Policy, as well as any governing laws or regulations.

The policy applies to all Cim Finance network users: employees, administrators, contractors, systems, applications and networks. All employees of Cim Finance are subject to this policy and required to abide by it.

For confidentiality and security reasons, the firewall policy has not been published on the website on Cim Finance.
